**EARN FREE BNB**

# 1. INTRODUCTION

Introducing to the community BEARBNB's white paper aims to help the community better understand our vision, strategy and roadmap.

We'll go over our one-of-a-kind redistribution process in great detail. It's a unique feature of the BSC ecology. We are pleased to be one of the projects providing significant advantages to the community through an automated incentive system. Are you feeling excited?

BEARBNB is the next evolution of Binance Smart Chain's (BSC) profitable contract, in which you will be paid in BNB rather than tokens. Simply hold BEARBNB tokens in your wallet to receive BNB.

BEARBNB is an owner-created decentralized token that acts as an independent liquidity generation protocol and frictionless autonomous yield farming.

BEARBNB token is one of the projects that bring the most benefits to holders successfully launched on Binance Smart Chain, has unique features of daily rewards in BNB for holder this token.

## 2. DISTRIBUTION BNB

We have created a unique system that automatically confirms to every holder the amount due. We call it the BEARBNB PROCESS.

How it works for holders: You buy tokens and hold them, every 30 minutes you automatically get BNB in your wallet. No action is required. Your BEARBNB token count is stable and will not change.

If the transaction volume is low you may receive BNB slower, but don't worry, the amount of BNB will automatically be transferred to your wallet as soon as the transaction volume increases or you can also receive the amount of BNB instantly by making 1 small transaction (buying or selling 01\$ token)

## 3. TOKENNOMICS

Total Supply: 1.000.000.000.000

Burn: 500.000.000.000 (50%)

Token For Presale: 250.000.000.000 (25%)

Token For Pancakeswap: 150.000.000.000 (15%)

10% Redistribution In BNB

10% of every buy/sell is taken and redistributed to all BEARBNB holders. Hold BEARBNB tokens, earn BNB.

Auto Paid Every 30 Minutes

You don't need to claim your earned BNB. It's automatically sent to your wallet every 30 minutes.

2% Liquidity Pool and Buyback

2% of every transaction is transformed into liquidity for Pancakeswap and use for buyback

## **4. PURPOSES OF BEARBNB**

BEARBNB is a decentralized token that is created and thought of by its holders. It functions as a self-contained liquidity generation protocol and autonomous yield farming. The BEARBNB coin is one of the greatest projects with the maximum benefit for holders, which offers unique features such as daily BNB awards for holders who keep the token in their wallets.

The BEARBNB project is focused on making a platform to promote cryptographic ads in telegram through an API that we are developing and which will be implemented through a BOT, both advertisers and publishers can manage their advertising campaigns , generate income by watching advertising, to use the platform and all its functions must be holders of the BEARBNB, in order to access the multiple functions that this bot will have. A continual flow of BUY / SELL of the token is guaranteed with the revolutionary BEARBNB concept, allowing holders to get their passive BNB earnings without doing anything.

We are also developing other great functions to bring the highest benefit to the BEARBNB token holders community:

- BEARBNB POOL
- BEARBNB Swap
- BEARBNB Wallet
- BEARBNB Farm
